Report Description

This report provides a summary count and detailed report for GPRA corrective action goal events for the user selected 2005, 2008 or 2020 GPRA CA baseline. The report shows hazardous waste sites in the selected reporting universe that have CA400, CA550, CA725, CA750, CA900, and CA999 events that are: 1) in the selected date range, and 2) marked as facility-wide. There is a maximum of one (1) count per facility per event code for the summary version of this report. Note: CA900 and CA999 are treated as one event code. If a facility has both a CA900 and CA999 event, the CA900 event will be included in the counts, but the CA999 event will not be included. All counts are based on the most recent date for an event within the specified date range except for the Reporting Universe Facility Summary which counts all facilities in the selected universe regardless of the date range specified, and regardless of whether or not the facility has a CA400, CA550, CA725, CA750, CA900, or CA999 event. The portion of the Summary report displays counts by NCAPS ranking. The detailed version of this report lists all occurrences of the corresponding Corrective Action CA400, CA550, CA725, CA750, CA900, and CA999 events within the date range selected and indicates facility level progress.
